CAETANO

WINNER Volvo 13.1m

Winner is a coach developed for tourism, intercity and school transportation.

The Volvo version of this coach has a provision for insertion of a lift platform integrated in the front steps of the front door, a solution already implemented in several markets, allowing a first class accessibility to all passengers. Besides, Winner stands up not only for its quality material, design and safety, as also for its generous dimensions which means additional comfort during the journey.

WINNER Mercedes-Benz 12.5m

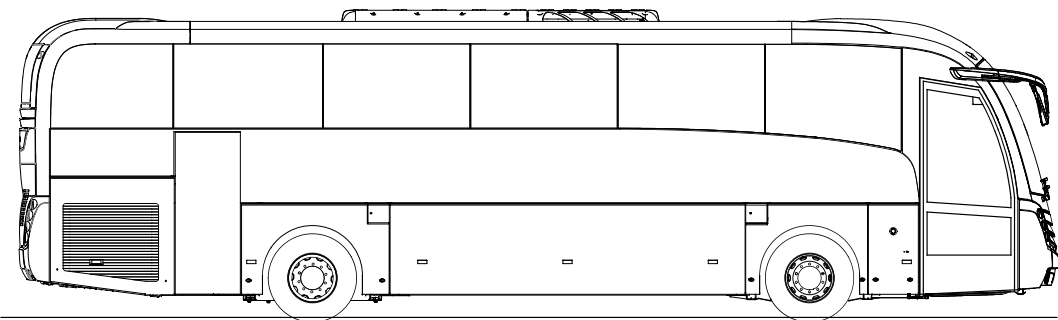

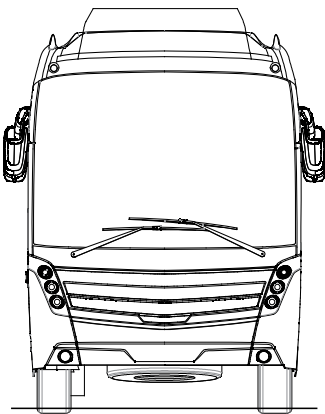

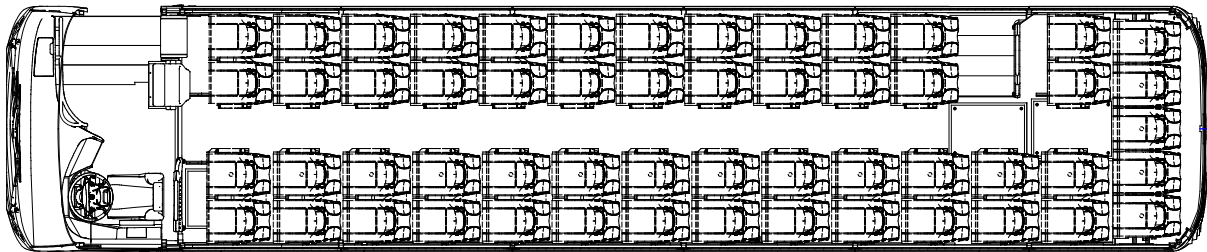

Winner is a quality reference among coaches, projecting the very best that CaetanoBus has been developing in this industry for 70 years of activity. This coach stands out for its interior comfort, inclusive design, safety and quality of material. The rear service door, the door for luggage compartment, and the ramped stage with an amphitheater effect makes Winner totally exclusive in tourism and intercity service, allowing a perfect journey.
